

Studio Evaluation for the Landscape Architecture Program, UBC				
Date				
Instructor's Name				
Student's Name				
Studio				
	low	medium	high	comments
Completeness - ability to complete projects fully and on time				
All projects due to date are complete				
Design Process - ability to initiate and sustain an effective, creative and productive design process throughout the project.				
Ability to define issues and requirements for design				
Ability to apply appropriate process tools and techniques				
Ability to identify and critique appropriate case studies and precedents				
Ability to generate thoughtful design concepts				
Ability to develop and refine concepts throughout design process				
Design Content - awareness and knowledge of core subject areas in landscape architecture and ability to apply that knowledge in design.				
Consistency and competency in form giving				
Selection and use of materials				
Experiential quality				
Visual and spatial fluency, spatial sequencing				
Resolution of functional issues and requirements				
Knowledge of discipline-related subjects and concepts				
Resolution of contextual issues and requirements, appropriateness				
Design Media - knowledge of, and fluency with, visual media and representation as a means of design investigation and communication.				
Knowledge of, and skill with, relevant media				
Ability to determine and apply appropriate media to design process				
Craft and quality of representations				
Scholarship - ability to initiate and sustain significant intellectual inquiry through design.				
Intellectual / creative ambition and rigour				
Ability to sustain significant inquiry throughout design process				
Ability to articulate and communicate ideas and points of view				
Engagement - ongoing participation in, and contribution to, studio.				
Regularly participates and contributes to class				
Effectively engages faculty and peers				
Seeks out and responds productively to criticism				
Supplements design process with effective reading and research				
Maintains logical and whole record of design process and products
