Patrick Condon, Professor, Landscape Architecture

Christopher, MacDonald, Architecture

Graduate Assistant, Elizabeth Laing "Elizabeth Laing" <elizabethlaing@gmail.com>,

**Assignment 3a – Individual projects. Concept Phase.**

This brief assignment will get us through the first week of your individual proposals. Here are your tasks.

1.        Produce a goal and objectives statement for your project. Goal should be one sentence. Objectives are the actions necessary to get you to the goal, usually measurable benchmarks. From my experience you will get between 5 and 10 objectives.
2.        Summarize the research you have done, including references. Summary about 500 words.
3.        From that write up and diagram design principles for your project. From my experience you will get between 4 and 9 principles.
4.        Do a diagrammatic plan for your project. Can be graphically rough but should be to scale and include rough but to scale sections as necessary.

Review date. Pinup review October 27 at 2 p.m. place to be announced.
